***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to a life sciences laboratory system comprising a networked computer system, and a virtual research environment with a data coupling mechanism and a processor, classified in class 702, subclass 19.
- II. Claim 8, drawn to a virtual community system comprising a networked computer system defining a virtual community for a plurality of users and an index service provider, classified in class 702, subclass 20.
- III. Claim 9, 14-16 drawn to a life sciences network portal system comprising a networked computer system which defines a portal, a workflow system, a data store, a product specifying the system and an indexing mechanism, classified in class 707, subclass 102.
- IV. Claims 10-13, drawn to a life sciences laboratory system which comprises a networked computer system, a virtual research environment, and a framework which provides an interface to differing laboratory equipment, classified in class 707, subclass 102R.
- V. Claims 17-27, drawn to an information system providing a secure online environment for bioinformatics research comprising various datastores and identification modules, access control, encryption etc, classified in class 703, subclass 11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V each unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are each different systems. Each system comprises different programmed modules for vastly differing functionality. Each system uses differing data, comprises differing components for differing purposes. Each system is separately classified. Each system would require a differing search to identify literature and patents related to the vastly differing modules. As such, the search of all 5 inventions would pose an undue burden upon the examiner if not restricted.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

If the examiner has required restriction between product and process claims: Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product will be entered** as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. **Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined.** See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder.

Art Unit: 1631

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP 804.01.
